

August 28, 2007

Dear Dr. Pape,

Although I have visited many dentists over the years I can not remember ever receiving better care. You and your Staffs' concern for the patient goes beyond dentistry, it goes to the patients' total well-being. Might I add, The Dental Hygienists in your office are unsurpassed not only as professionals but also as delightful people.

I was highly impressed with the thoroughness of your explanations during the consultation for the procedure for my implants and as a result I proceeded with your recommendations and have been very well pleased with the outcome. My bite is true, my smile is unblemished and there have been no problems.

Dr. Pape, thank you for your talents, my smile would not be the same without them.

With respect and admiration,

Don Allmond
